

ASSEMBLY LAW AND PUBLIC SAFETY COMMITTEE

STATEMENT TO

ASSEMBLY, No. 3835

with committee amendments

STATE OF NEW JERSEY

DATED: OCTOBER 13, 2022

The Assembly Law and Public Safety Committee reports favorably and with committee amendments Assembly Bill No. 3835.

As amended and reported by the committee, Assembly Bill No. 3835 requires each board of education of a school district, board of trustees of a charter school or renaissance school project, and chief administrators of nonpublic schools to provide critical mapping data for all schools and school grounds to local law enforcement authorities. For purposes of the bill, “critical incident mapping data” means information provided in electronic or digital form to assist first responders in an emergency including, but not limited to:

- aerial images of schools;
- floor plans, including room and suite numbers;
- building access points;
- locations of hazardous materials and utility shut-offs; and
- any other relevant location information.

Under current law, each board of education or chief school administrator of a nonpublic school is required to provide to local law enforcement authorities a copy of the current blueprints and maps for all schools and school grounds within the school district or nonpublic school. In the case of a school building located in a municipality in which there is no municipal police department, a copy of the blueprints and maps is required to be provided to an entity designated by the Superintendent of State Police. A board of education or chief school administrator of a nonpublic school is also required to provide revised copies to law enforcement authorities or a designated entity any time there is a change to the blueprints or maps.

The bill would amend current law to require boards of education of school districts, boards of trustees of charter schools and renaissance school projects, and chief administrators of nonpublic schools to provide to local law enforcement authorities critical incident mapping data, rather than blueprints and maps, for all schools and school buildings. For school buildings located within a municipality where there is no municipal police department, the mapping data would be provided to an entity designated by the Superintendent of State Police. Any time there is a change to the

mapping data, a board of education of a school district, board of trustees of a charter school or renaissance school project, or chief administrator of a nonpublic school would be required to provide revised data to law enforcement authorities or a designated entity. Mapping data provided pursuant to this bill would be required to be compatible with all platforms and applications used by local, State, and federal law enforcement authorities; provided in a printable format; and verified for accuracy through an annual walkthrough of school buildings and school grounds. Nothing in the bill would be construed to require local law enforcement authorities or designated entities to access critical incident mapping data using third party viewing software.

COMMITTEE AMENDMENTS

The committee amended the bill to expressly state that the provisions of the bill would apply to boards of trustees of charter schools and renaissance school projects.
