

STATEMENT TO

[Third Reprint]

**SENATE, No. 2769**

with Senate Floor Amendments  
(Proposed by Senator VITALE)

ADOPTED: MAY 22, 2023

These Senate amendments revise a requirement for nursing homes that are part of a health care system to submit a consolidated owner-certified financial statement for all nursing homes and related parties that are part of the health care system. Specifically, the amendments:

- replace references to “health care systems” with references to “common ownership”;
- remove a requirement that a statement of operations be submitted with the single owner-certified financial statement;
- specify that the single owner-certified financial statement include the financial information required under the bill for each nursing home that is under common ownership; and
- remove language providing that the single owner-certified financial statement may be submitted in a supplemental schedule.
