STATEMENT

This bill requires hospital, medical and health service corporations, commercial insurers, health maintenance organizations, health benefits plans issued pursuant to the New Jersey Individual Health Coverage and Small Employer Health Benefits Programs, the State Health Benefits Program, and the School Employees' Health Benefits Program, to provide coverage, for medically necessary behavioral health care services and to meet the requirements of the federal Paul Wellstone and Pete Domenici Mental Health Parity and Addiction Equity Act of 2008, which prevents certain health insurers that provide mental health or substance use disorder benefits from imposing less favorable benefit limitations on those benefits than on medical or surgical benefits, commonly referred to as mental health parity.

The bill amends several statutes, initially enacted in 1999, which require hospital, medical and health service corporations, individual and group health insurers and the State Health Benefits Program to provide coverage for biologically-based mental illness under the same terms and conditions as provided for any other sickness. The bill expands that coverage to include coverage for "behavioral health care services," which is defined as procedures or services rendered by a health care provider or health care facility for the treatment of mental illness, emotional disorders, or drug or alcohol abuse.

1 The bill also removes certain provisions of the statutes that
2 provide that nothing in those statutes shall be construed to change
3 the manner in which the insurer determines:
4 (1) whether a mental health care service meets the medical
5 necessity standard as established by the insurer; or
6 (2) which providers shall be entitled to reimbursement or to be
7 participating providers, as appropriate, for mental health services
8 under the policy or contract.
9 The bill also supplements the "Health Care Quality Act,"
10 P.L.1997, c.192 (C.26:2S-1 et al.) to place certain restrictions on
11 carriers to ensure parity with respect to imposing a non-quantitative
12 treatment limitations, the use of out-of-network providers, and in-
13 plan exceptions for behavioral health care services.
14 The bill further specifies that for any utilization review or benefit
15 determination for the treatment of a substance use disorder,
16 including but not limited to prior authorization and medical
17 necessity determinations, the clinical review criteria shall be the
18 most recent Treatment Criteria for Addictive, Substance-Related,
19 and Co-Occurring Conditions established by the American Society
20 of Addiction Medicine. No additional criteria shall be used during
21 utilization review or benefit determination for treatment of
22 substance use disorders.
23 In addition, the bill prohibits a carrier that provides coverage for
24 prescription drugs from excluding coverage for any FDA-approved
25 forms of medication assisted treatment prescribed for the treatment
26 of alcohol dependence or treatment of opioid dependence, if such
27 treatment is medically necessary, according to most recent
28 Treatment Criteria for Addictive, Substance-Related, and Co-
29 Occurring Conditions established by the American Society of
30 Addiction Medicine.
31 The bill also requires carriers to submit an annual report to the
32 Department of Banking and Insurance on or before March 1 that
33 contains certain information concerning compliance with the bill's
34 provisions. The bill also requires, not later than May 1 of each
35 year, the Department of Banking and Insurance to issue a report to
36 the Legislature pursuant to section 2 of P.L.1991, c.164 (C.52:14-
37 19.1) and to make that report available to the public. The report is
38 to detail certain information relating to the department's oversight
39 of the bill's provisions.
