ASSEMBLY, No. 2360

with Assembly Floor Amendments
(Proposed by Assemblywoman CHAPARRO)

ADOPTED: MAY 20, 2021

These floor amendments: 1) prohibit an electric public utility (utility) from charging greater than a residential rate, or greater than an equivalent electricity rate or load management program that is offered by the utility specifically for residential electric vehicle (EV) charging, for service intended for the use of a specific resident in a planned real estate development (development); 2) provide that the bill does not prevent a development that has installed an EV charging station from setting the price of the sale of electricity for the use of its EV charging equipment provided as a service; and 3) makes clarifications to two defined terms in the bill.
