STATEMENT

1
2
3 This bill requires health insurers (health, hospital and medical
4 service corporations, commercial individual and group health
5 insurers; health maintenance organizations, health benefits plans
6 issued pursuant to the New Jersey Individual Health Coverage and
7 Small Employer Health Benefits Programs, the State Health
8 Benefits Program, and the School Employees' Health Benefits
9 Program) to provide health benefits coverage for any expenses
10 incurred by a covered person for the prescription and purchase of
11 buprenorphine or buprenorphine/naloxone for the treatment of
12 pain. The bill provides that coverage is not subject to step therapy
13 or fail-first protocols.

14 Buprenorphine and buprenorphine/naloxone, are medications
15 that are used to treat chronic pain. This bill seeks to make these
16 medications more readily available for people with chronic pain by
17 prohibiting health insurers from applying step therapy or fail-first
18 protocols as a condition for coverage. These protocols are a type of
19 prior authorization which currently may be used by health insurers
20 to require patients to use riskier, more addictive drugs for the
21 treatment of pain, before using buprenorphine and
22 buprenorphine/naloxone, which are less addictive and less likely to
23 be abused by patients.
