ASSEMBLY, No. 4530 STATE OF NEW JERSEY 219th LEGISLATURE

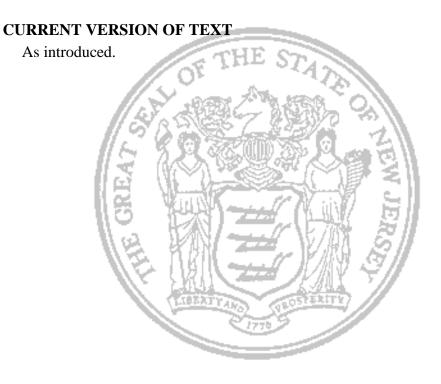

INTRODUCED AUGUST 13, 2020

Sponsored by: Assemblywoman SHANIQUE SPEIGHT District 29 (Essex) Assemblywoman VALERIE VAINIERI HUTTLE District 37 (Bergen) Assemblyman JOHN ARMATO District 2 (Atlantic)

Co-Sponsored by: Assemblywomen Jasey, Timberlake, Chaparro, Assemblyman Stanley, Assemblywoman Swain and Assemblyman Tully

SYNOPSIS

Provides that New Jersey residents have access to one cost-free postpartum home visit.

(Sponsorship Updated As Of: 6/21/2021)

2

AN ACT concerning postpartum home visits and supplementing Title
 26 of the Revised Statutes.

3 4

BE IT ENACTED by the Senate and General Assembly of the State of New Jersey:

5 6 7

1. The Legislature finds and declares:

a. The weeks following birth are a critical period for a woman
and her infant, setting the stage for long-term health and well-being;
b. During this period, a woman is adapting to multiple
physical, social, and psychological changes, while simultaneously
recovering from childbirth, adjusting to changing hormones, and
learning to feed and care for her newborn;

c. Like prenatal care, the postpartum health care visit that
typically occurs six weeks after childbirth is considered important
to a new mother's health; however, for many women, the six-week
postpartum visit punctuates a period devoid of formal or informal
maternal support;

d. Additionally, according to the American College of
Obstetricians and Gynecologists, as many as 40 percent of women
do not attend a postpartum visit in the United States;

e. During the time immediately following delivery, health care
providers are uniquely qualified to enable a woman to access the
clinical and social resources she needs to successfully navigate the
transition from pregnancy to parenthood;

26 Studies regarding the Durham Connects program, which f. 27 provides postpartum home visits by trained registered nurses to all families in Durham County, North Carolina that have newborns 28 29 between the ages of two to 12 weeks old, have found that participating families: experience reduced rates of clinical maternal 30 31 anxiety; have safer and more child-friendly home environments; 32 utilize higher quality child care; have better community 33 connections; exhibit safer and more responsible parenting 34 behaviors; have higher levels of father involvement; and experience 35 a significantly reduced rate of infant emergency medical care;

g. Research also indicates that postpartum education and care
lead to lower rates of maternal morbidity and mortality, as many of
the risk factors for post-delivery complications, such as
hemorrhaging or a pulmonary embolism, may not be identifiable
before a woman's discharge after birth;

h. Such data demonstrate the wide ranging benefits to women,
children, and families when a mother and infant receive support
from the medical community within days after delivering a child;
and

45 i. It is, therefore, in the public interest for the Legislature to46 remove barriers regarding access to postpartum care and to establish

<u>٦</u>	
\mathcal{I}	

the infrastructure for New Jersey mothers to receive one cost-free
postpartum home visit in which a member of the medical community
provides the necessary physical, social, and emotional support critical
to recovery following childbirth.

5 6

2. a. Each hospital and birthing facility shall:

(1) schedule a postpartum home visit for each pregnant patient
who gives birth at the hospital or facility, following the birth of the
patient's infant and prior to the patient's discharge from the hospital
or facility. The postpartum home visit shall be scheduled for a date
that is within seven days of the patient's discharge; and

(2) provide one postpartum home visit for each pregnant patient
discharged from the hospital or facility following the birth of the
patient's infant, as scheduled by the hospital or facility pursuant to
paragraph (1) of subsection a. of this section.

b. A hospital or birthing facility shall waive the receipt of any
copayment, coinsurance, or deductible that may be required from a
patient, pursuant to the patient's contract with a third party payer,
for services provided pursuant to subsection a. of this section.

c. Notwithstanding any other law to the contrary, a hospital or
birthing facility shall not seek payment from a patient for services
provided pursuant to subsection a. of this section, including any
remaining balances following payment by an applicable third party
payer.

d. The provisions of this section shall not apply if the patientobjects to receiving a postpartum home visit for any reason.

e. As used in this section:

"Birthing facility" means an inpatient or ambulatory health care
facility licensed by the Department of Health that provides birthing
and newborn care services.

31 "Hospital" means an acute care hospital licensed by the
32 Department of Health pursuant to P.L.1971, c.136 (C.26:2H33 1 et al.)

34 "Postpartum home visit" means a home visit to a woman and 35 infant, within the first seven days following delivery, by a licensed healthcare provider to ensure proper recovery from childbirth and 36 37 includes, but is not limited to: a weight and health check of the 38 newborn; an assessment of the physical wellness of the woman; 39 breastfeeding support; assistance identifying and coping with 40 postpartum depression or other behavioral health concerns; and any 41 referrals for medically necessary follow-up healthcare.

42

3. The Department of Health, pursuant to the "Administrative
Procedure Act," P.L.1968, c.410 (C.52:14B-1 et seq.), shall adopt
rules and regulations necessary to implement the provisions of this
act.

A4530 SPEIGHT, VAINIERI HUTTLE

2

4. This act shall take effect on the first day of the fourth month
 next following the date of enactment, but the Commissioner of
 Health may take such anticipatory administrative action in advance
 thereof as may be necessary for the implementation of this act.

STATEMENT

9 This bill provides that New Jersey residents have access to one 10 cost-free postpartum home visit. As defined in the bill, a 11 "postpartum home visit" means a home visit to a woman and infant, 12 within the first seven days following delivery, by a licensed 13 healthcare provider to ensure proper recovery from childbirth and 14 includes, but is not limited to: a weight and health check of the 15 newborn; an assessment of the physical wellness of the woman; 16 breastfeeding support; assistance identifying and coping with 17 postpartum depression or other behavioral health concerns; and any 18 referrals for medically necessary follow-up healthcare.

19 The weeks following birth are a critical period for a woman and 20 her infant, setting the stage for long-term health and well-being. 21 During this period, a woman is adapting to multiple physical, 22 social, and psychological changes, while simultaneously recovering 23 from childbirth, adjusting to changing hormones, and learning to 24 feed and care for her newborn. Like prenatal care, the postpartum 25 health care visit that typically occurs six weeks after childbirth is 26 considered important to a new mother's health; however, for many 27 women, the six-week postpartum visit punctuates a period devoid of 28 formal or informal maternal support. Additionally, according to the 29 American College of Obstetricians and Gynecologists, as many as 30 40 percent of women do not attend a postpartum visit in the United 31 States.

32 During the time immediately following delivery, health care 33 providers are uniquely qualified to enable a woman to access the 34 clinical and social resources she needs to successfully navigate the 35 transition from pregnancy to parenthood. Studies regarding the 36 Durham Connects program, which provides postpartum home visits by 37 trained registered nurses to all families in Durham County, North 38 Carolina that have newborns between the ages of two to 12 weeks old, 39 have found that participating families: experience reduced rates 40 reduced rates of clinical maternal anxiety; have safer and more 41 child-friendly home environments; utilize higher quality child care; 42 have better community connections; exhibit safer and more 43 responsible parenting behaviors; have higher levels of father 44 involvement; and experience a significantly reduced rate of infant 45 emergency medical care. Research also indicates that postpartum 46 education and care lead to lower rates of maternal morbidity and

mortality, as many of the risk factors for post-delivery
 complications, such as hemorrhaging or a pulmonary embolism,
 may not be identifiable before a woman's discharge after birth.

4 Such data demonstrate the wide ranging benefits to women, 5 children, and families when a mother and infant receive support 6 from the medical community within days after delivering a child. It 7 is, therefore, the sponsor's belief that is in the public interest for the 8 Legislature to remove barriers regarding access to postpartum care and 9 to establish the infrastructure for New Jersey residents to receive one 10 cost-free postpartum home visit in which a member of the medical 11 community provides the necessary physical, social, and emotional 12 support critical to recovery following childbirth.

13 Specifically, this bill requires each hospital and birthing facility in the State to schedule a postpartum home visit, to take place 14 15 within seven days of the patient's discharge, for each pregnant 16 patient who gives birth at the hospital or facility, following the birth 17 of the patient's infant and prior to the patient's discharge from the 18 hospital or facility. The hospital or birthing facility must also 19 provide the scheduled postpartum home visit. Under the bill, a 20 hospital or birthing facility will not be required to schedule and 21 conduct a postpartum home visit if the patient objects to receiving 22 the visit for any reason

23 The bill includes two provisions to ensure that the services 24 provided are cost-free to the patient. First, under the bill, a hospital 25 or birthing facility is directed to waive the receipt of any 26 copayment, coinsurance, or deductible that may be required from a 27 patient, pursuant to the patient's contract with a third party payer, 28 for services provided pursuant to the bill. Second, a hospital or birth facility is prohibited from seeking payment from a patient for 29 30 services provided pursuant to the bill, including any remaining 31 balances following payment by an applicable third party payer.
