COMMITTEE

STATEMENT TO

[First Reprint]

SENATE, No. 2518

with committee amendments

STATE OF NEW JERSEY

DATED: JULY 9, 2020

The Assembly Financial Institutions and Insurance Committee reports favorably and with committee amendments Senate Bill No. 2518 (1R).

As amended, this bill delays the physical examination requirement for certain student-athletes who participate in school-sponsored athletic activities during the fall athletic season of the 2020-2021 school year.

Under current law, before a student enrolled in grades six through 12 may participate in a school-sponsored interscholastic or intramural athletic activity, the student-athlete is required to receive a physical examination within 365 days before the first day of official practice of the athletic season. When a student-athlete's physical examination was completed more than 90 days before the first day of official practice, current law also requires the student-athlete to provide a health history update questionnaire, which is completed by the student's parent or guardian and reviewed by the school nurse and athletic trainer.

Under the bill, a student-athlete who has not completed a physical examination within 365 days prior to the first day of official practice in the fall athletic season of the 2020-2021 school year would be permitted to participate in a school-sponsored interscholastic or intramural athletic team or squad during that season, provided that the student-athlete completes the physical examination before the end of the athletic season, and provided that the student-athlete's parent or guardian provides proof, before the first day of official practice of the athletic season, that the physical examination is scheduled.

A student-athletic who qualifies for participation in a school-sponsored athletic activity under the provisions of this bill would be required to complete the health history update questionnaire before the first day of official practice of the fall athletic season of the 2020-2021 school year. If the student-athlete answers in the affirmative to any question included in the health history update questionnaire, then the student-athlete may not participate in the school-sponsored athletic

activity until he is further evaluated by the school physician, or if a school physician is not available, any other licensed physician.

As amended and reported, this bill is identical to Assembly Bill No. 4295 (1R), as also amended and reported by the committee.

COMMITTEE AMENDMENTS:

The committee amended the bill to require that a student-athlete who has not completed a physical examination within 365 days prior to the first day of official practice in the fall athletic season of the 2020-2021 school year would be permitted to participate in a school-sponsored interscholastic or intramural athletic team or squad during that season, provided that the student-athlete completes the physical examination before the end of the athletic season, and further require that the student-athlete's parent or guardian provide proof, before the first day of official practice of the athletic season, that the physical examination is scheduled.
